

LINGO SHELVING SYSTEM

01.01.2025

LINGO SHELVING

You will find exceptional versatility with the functional and flexible Lingo Shelving System. It encapsulates the true meaning of flexibility. Its modular construction provides the highest degree of functionality and versatility and its style and quality makes it suitable for both contemporary and classic library environments.

The Lingo shelving system offers endless possibilities of function and design. The construction of the shelving system, with 25 mm increments, allows for easy assembly and adjustment without the use of specific tools.

Lingo is available as a single- or double-sided shelving, with or without castors, and as a straight, curved or combined solution. It can be fitted with steel or wooden shelves, as well as a wide variety of other functional components. The result – a customisable shelving systems that fits the requirements of your specific library.

Moreover, the basic Lingo shelving configurations are GS-approved by TüV in accordance with the DIN EN 16121/12.17 standard as regards to safety, strength, durability and stability. See under Technical Specifications for further information on installation.

You will find all the standard products in this overview. For additional inspiration we invite you to visit our website where you can find project inspiration from our latest projects around the world. Our professional sales team is ready to help you with any questions you may have.

FSC

WOOD FROM SUSTAINABLE MANAGED FORESTRY

We are committed to increasing the share of sustainable raw wooden material in our products and thereby support responsibly managed forests – for a better world.

Governments and local authorities are specifying the supply of legal and responsibly sourced wood in their procurement policies.

We have invested in a Chain-of-Custody Multi-site certificate (FSC-C144988), issued by FSC, which documents, that we can offer wood from responsibly managed forests. FSC (Forest Stewardship Council ®) is an international labelling scheme, that documents that FSC labelled products originate from sustainable forestry.

Working with certified suppliers, we can now offer painted and veneered wooden components as fully FSC Mix certified (noted in this document for each wooden product, which is FSC-certified. We are continuously working on increasing the number of certified products in our portfolio. To stay informed about our environmental certifications, we recommend visiting our website regularly to access the most recent information.

What is sustainable managed forestry?
According to the FSC, forests, managed according to their principles and criteria, mean fair conditions for workers, respect for indigenous communities and local populations as well as strict environmental controls.

The FSC label ensures that the trees that are harvested are replaced or allowed to regenerate naturally.

The FSC label also ensures that all the wood is tracked from the forest to the store. Every link between the forest and the consumer is certified to make it clearly identifiable which wood is from sustainable forestry and which is not.

EU ECOLABEL

EU-ECOLABELLED FURNITURE

We are pleased to add the EU Ecolabel to our preferred eco labels. The EU Ecolabel certification reflects our unwavering commitment to providing our customers with documented environmentally friendly choices.

The EU Ecolabel is an official label that complies with European legislation on sustainable actions. We present a selection of EU-ecolabelled library furniture, facilitating the choice of more sustainable and responsible solutions. The requirements are based on a life-cycle assessment of the product and requirements are imposed on production, use and disposal.

The purpose of the EU Ecolabel is to reduce the overall environmental impact from production and consumption. Therefore, the environmental label considers the entire journey of the product and the environmental issues that arise along the way.

Working with certified suppliers, we can now offer the majority of our steel and wooden components as EU Ecolabelled. We are continuously working on increasing the number of certified products in our portfolio. To stay informed about our environmental certifications, we recommend visiting our website regularly to access the most recent information.

Why choose the EU Ecolabel?
An increasing number of businesses and individuals are conscious of the environmental footprint they leave when designing a library.

By choosing EU Ecolabel certifed products, you do not only contribute to sustainability and environmental conservation but are also assured of meeting stringent eco-friendly standards.

The EU Ecolabel ensures:
- Rigorous conditions for environmentally harmful substances.
- Specific criteria for each product type to increase the label's business relevance.
- Stringent requirements for health-hazardous substances.
- Third-party approval, ensuring the credibility of the labelling.

BAYS WITH ADJUSTABLE FEET AND TOP SHELVES
They are available as starter and add-on bays.

BAYS WITH ADJUSTABLE FEET AND OVERLAYING TOP PLATES
They are availabe as starter and add-on bays. You can combine 18°, 26° and straight bays to create the desired complete shelving. The adjustable feet can be adjusted even when the bays are loaded.

BAYS WITH CASTORS
Castors may only be fitted with double-sided bays which do not exceed a maximum height of 1520 mm and a maximum of 3 adjoining bays. Bays on castors are not to be used for transportation. The castors are only fitted in order to move the shelving system around, see instruction below. Crossing doorsteps can be dangerous. After moving the shelving you must lock the brakes. Shelving systems generally have to be moved and placed on a flat, level and horizontal floor.

There is a risk of getting hurt if the shelving system is moved incorrectly. Therefore, the following rules of conduct must be followed:

- It must be ensured that no items can fall of the shelves while moving. If in doubt, then remove items before moving.
- Use a maximum of two people to move the shelving system.
- Make sure to move the shelving system in a smooth movement, avoid jerky movements.
- Only move the shelving system at the ends, do not stand at the long sides of the shelving system during the move.
- To avoid injuries, you must ensure that you always have enough space to the surrounding walls and other furniture.
- If more than one person is involved, be sure to coordinate direction and intention, before actually moving the shelving system.
- Ensure that you only move the shelving system on a flat, level floor with no incline. The floor must be free of any items. Even small parts may cause a sudden blockage of a castor. In this case, the shelving system could tip or damage the floor.
- Before moving, unlock the wheel brakes.
- After moving, lock the wheel brakes.

WEIGHT ON BAYS WITH CASTORS
Visible castors on castor frame are available with and without brakes. We recommend installing at least 2 castors with brakes for one or more adjoining bays. Max. load of 100 kg per visible castor/400 kg per bay.

Hidden castors on castor frame are delivered without brakes, so when shelving is positioned in place, you must adjust the adjustable feet. Max. load of 100 kg per hidden castor/400 kg per bay.

Bays with castor plates are mounted with either 4, 6 or 8 castors, 2 of which are with brakes. Max. load of 400 kg per bay.

BAYS WITH SHELVES
Bays with back panel/back frame: Each bay must have at least 2 shelves (4 shelves for double-sided bays) - top and bottom - screwed into the panels for stability. The remaining shelves can be inserted without screws.

Bays with cross brace: Each bay above H920 mm must have at least 3 shelves (6 shelves for double-sided bays) - top, middle and bottom - screwed into the panels for stability.

STABILITY
End panels are provided with adjustable feet, except for panels intended for use with castor plates. Single-sided panels are supplied with wall securement and must be fixed to the wall.

ROUNDED EDGES
All storage units and brackets have rounded edges.

DENSITY
Chip board has a density of 600-700 kg/m3
Block board has a density of 602 kg/m3 (+/- 2 %)
MDF has a density of 700 kg/m3 (+/- 5-7 %)

TECHNICAL SPECIFICATIONS

GENERAL SPECIFICATIONS

BROWSERS
Shelvings can be fitted with browsers. Pulling out one or more browsers could cause the shelving to tip. Ensure that the shelving cannot tip by securing shelving. If in doubt, you must fix the shelving to the floor, wall or ceiling.

For safety reasons:
- It is not allowed to load browsers with more than 45 kg.
- Do not use the browsers as a step. The lowest browser must be installed at least 50 cm above the ground. This should ensure that the browser is not used as a step.
- Single-sided bays must be fixed to the wall. A maximum of 3 drawers per bay is allowed.
- Only 1 browser per side and bay is allowed on double-sided bays.
- Do not install pull-out browsers on shelving with castors.

ASSEMBLY
All wooden shelving units come knocked-down. Assembly guidelines can be found on our website.

STEEL COMPONENTS

are powder coated with standard polyester based powders that secures high UV resistance. Powders comply with EN 45545 (fire protection - similar to DIN 4201). Thickness of the coating is 60-80 my.

The powder used includes:
- no azo dyes that can release a leaving carcinogenic amine component
- no triglycidylisocyanurate (TGIC)
- no heavy steel-containing pigments such as lead and cadmium
- no volatiles

Antibacterial equipping of surfaces upon request.

BACK FRAMES
are made of 30 x 20 x 1.5 mm steel tubes. The back frame is easy to assemble between the panels.

CROSS BRACES
are made of galvanized steel Ø4 mm.

BACK PANELS
are made of 0,9 mm steel.

SHELVES AND BROWSERS
are made of 0.9 mm sheet steel. The steel shelves have a H25 mm frontedge, the steel top shelves have a H25/47 mm frontedge.

BRACKETS
are made of 1.4 mm sheet steel.

FRAMES FOR CASTORS
are made of:
visible castors: 40 x 30 x 2 steel tubes. The end plates are made of 2 mm sheet steel.
hidden castors: 30 x 30 x 2. steel tubes. The end plates are made of 2 mm sheet steel, the plinth is made of 0,9 mm sheet steel.

STRAIGHT PLINTHS
are made of 1,4 mm steel.

ROUND PLINTHS
are made of 0,9 mm steel.

BAY CONSTRUCTION

STARTER AND ADD-ON BAYS

A starter bay includes one right and one left end panel with holes on the inside of the panel. To add another bay, you must take off the right end panel, insert the add-on bay (panel with holes on both sides) and fix the right end panel from the starter bay to the add-on bay. See example below.

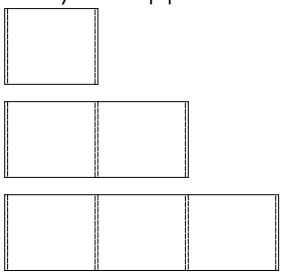

OVERLAYING TOP PLATES FOR STRAIGHT BAYS WITH ADJUSTABLE FEET

A straight overlaying top plate has a maximum length of 2750 mm.
If you build a shelving system with 1, 2 or 3 bays, then you can use just one freestanding top plate (depending on module size).
If you build a shelving system with more than 3 bays, then the overlaying top plates will be a combination of outer and intermediate overlaying top plates.

Freestanding wooden top plate

Is always used for 1 bay and can be used for 1, 2 or 3 bays. The top plate covers the end panels in both ends.

The Book LED lighting armature can be fitted on wooden top shelves and can be mounted over 1, 2 and 3 bays by use of connect fittings. Continuous runs require connect fitting.

The armature is CE-approved and available in white and steel as standard. For other colours, please ask customer service.

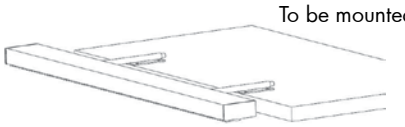

Armature

Model showing 2 bearing arms incl. light tube and louvre. Armature housing in aluminium.

Standard bearing arms

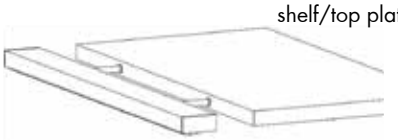

To be mounted on top of top shelf.

Front edge bearing arms

To be mounted on frontedge of predrilled top shelf/top plate (special request)

Below you will find a list of products needed when ordering lighting for 1, 2 or 3 bays. For 4 or more bays, you must use a combination of the armatures for 1, 2 or 3 bays by connecting the armatures with a connect fitting. Eg. for 10 bays, you can either use 5 x 2 bays (with 4 connect fittings) or 3 x 3 bays and 1 x 1 bay (with 3 connect fittings).
